PAST PERFORMANCE

- **Excel Medical/Hill-Rom:** Serves as trusted advisors across multiple domains including sales, marketing, and product development. Provides a customized training plan that fits into a project charter from contract execution through clinical go-live in hospitals across the U.S.
- **Gwinnett County Public Schools:** Analysis of health science programs: aligned pathways with industry need, guided goal setting, and build community partnerships to provide growth opportunities for the future of workforce development.
- **Georgia Association of Career and Technical Education:** Annual conference planning for health science educators including targeted topic selection, development and delivery of scenario driven workshops, and acquisition of industry expert speakers.
- **Department of Public Health:** Developed processes, documentation tools, responsibility matrix, community partnerships, and training materials to ensure clinical competency of staff and safe clinic operations during mass sheltering.
- **Clemetric:** Enhanced key features of software to optimize utilization to a spectrum of healthcare professionals in the clinical setting.
- **Penn State University:** Designed and facilitated workshop to intentionally propel rising healthcare professionals into scenario driven topics built to fill the gaps between traditional education and organizational need.
